Educate

Bring your IWB to life!

Benefits of Interactive Whiteboards

“We first introduced whiteboards in 2005. We now have 60 on the 3 campuses. The No 1 benefit is that they are a fantastic teaching tool to add to a teacher’s ‘e’ repertoire of resources.

It brings learning alive!

It makes learning more meaningful with a greater depth of student engagement which is critical in the learning process...”

Mrs. Jo Field

Head of Senior School

Firbank Grammar, Brighton, Victoria

Bring your IWB to life!

The titles in this catalogue are designed for use on an interactive whiteboard in the classroom.

This software is compatible with all interactive whiteboards including the following:

- AV Media Board
- Mimio
- SMART Board
- TeamBoard
- Hitachi StarBoard
- Promethean ACTIVboard
- Sony Interwrite Board
- Webster Board

What early childhood teachers say:

 **“BroadLEARN Early Learning is a key resource.”**

We use the BroadLEARN Early Learning Program with our 4 year old children and they really enjoy it. They are able to use the program with minimal teacher guidance and are fully engaged during the experience. The program encourages development of fine motor skills while using the mouse, reading and listening skills as well as

cooperation skills when using the program in groups. The instructions in the program, guide the children through the experience with ease and the familiar and simple layout enables the children to direct their own learning.

Caitlin Delahunty, Bambini Early Learning Centre

 **bambini**
early learning centre

BroadLEARN Early Learning

**AWARD
WINNER**

A comprehensive and highly engaging early childhood program that supports early mathematics and language work with its range of staged learning activities.

Benefits:

- Students will develop clear speaking, listening, reading and writing skills
- Encourages purposeful and exploratory play, risk-taking and flexible thinking
- Highly engaging for young learners

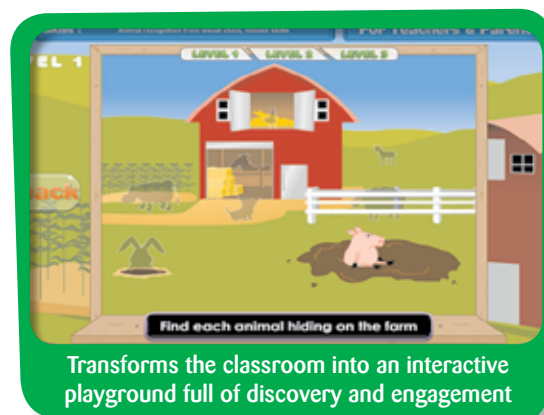

Features:

- Over 300 interactive resources in 11 themed units for use on an interactive whiteboard
- Interactive staged learning activities
- Multi-lingual translation activities, interactive karaoke songs and storybooks
- An extensive range of assessment and reporting resources, including student certificates and worksheets

What teachers say:

The instructions in the program guide the children through the experience with ease and the familiar and simple layout enables the children to direct their own learning.

Let's Use the Whiteboard: Telling the Time with Mr Wolf

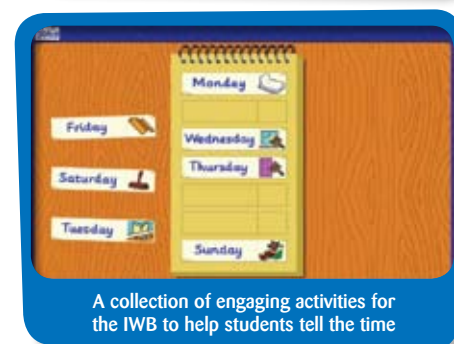

Children will learn the concepts, vocabulary and maths related to understanding time and telling time.

Benefits:

- Developing the concept of time is difficult and this is a playful aid to support teachers and children in an informal and friendly way
- Children will not only learn the relevant concepts relating to time but also sorting and ordering skills

Features:

- Teacher's toolkit containing a range of imagery and shapes for the creation of further activities
- Differentiated difficulty levels and record-keeping ability

Make the most of the hardware by using great software!

"Mult-e-Maths Toolbox is an outstanding resource for teachers!"

The entire package provides an effortless approach to explicit Mathematics teaching, whilst at the same time, an open endedness that widens the opportunities for students to further their problem solving capabilities.

Mult-e-Maths Toolbox complements a 'thinking' approach to the curriculum, particularly when paired with Interactive Whiteboard Technology (IWB). Having the ability to customise the IWB menu system to have direct access to the Mult-e-Maths toolbox, further enhances the immediacy needed when teaching in a multi-ability classroom.

All facets of the curriculum are addressed in Mult-e-Maths Toolbox; ie. fractions, place value, operations, shape, measurement, probability, chance and data. Within each area, you have access to a variety of mediums to emphasise the point you are making; e.g. different time pieces, shape perspectives and data handling tools.

The user interface is straight forward and enables the novice computer user to pick up the program easily, a child with mixed ability to manoeuvre without effort and a savvy computer teacher to explore and adapt to extend their class.

Mult-e-Maths Toolbox is a 'must have' in all classrooms as a basis for Mathematics teaching and learning programs.

Monique Corcoran, Curriculum Coordinator, Patterson Lakes Primary School

Mult-e-Maths Toolbox

A highly versatile resource that allows the teacher total flexibility in creating meaningful maths lessons. A toolbox to help teachers demonstrate and explain mathematical concepts more easily and effectively.

Benefits:

- Differentiated whole-class material will engage all children
- The Toolbox reinforces student's understanding of key mathematical concepts
- Promotes a greater understanding of mathematical concepts through the use of highly engaging and effective visual tools

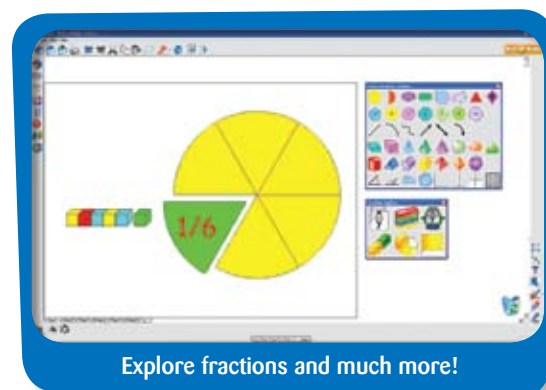

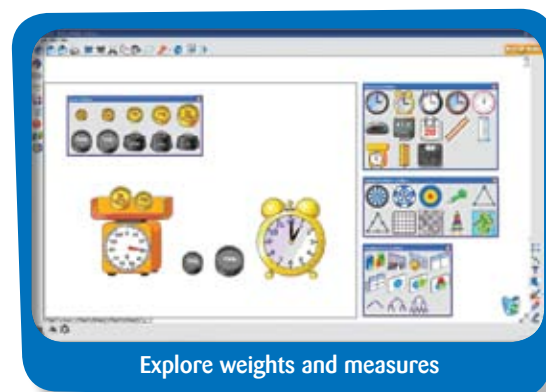

Features:

- 8 Toolboxes with over 60 interactive tools in total
- All tools are available to hand on one screen for easy access
- Provides a wealth of ideas for starter and lesson activities
- Ability to plan your activities at home and email them to yourself at school!

What teachers say:

... a set of colourful helpful mathematical tools to use to enhance your demonstration, explanation or clarification of the concepts worked through with a whole class on your interactive whiteboard... toolboxes provided with some interactive boards look very simplistic compared with this one.

Judy Sayers • Senior Lecturer in mathematics education

Mult-e-Maths Teaching Years 3-6

Mult-e-Maths Teaching Years 3-6 helps strengthen pedagogy, employing your Interactive Whiteboard as an effective resource. Organised into 7 strands across each year group, the program builds progression across topics and years.

Benefits:

- Encourages children to predict, manipulate, try things out, explain and discuss
- Encourages flexibility – the lesson builder allows you to personalize resources and organize lessons to suit the needs of your class

Features:

- The program incorporates suggestions, careful questioning and differentiation into every activity
- Versatile and flexible - teachers have complete control of how the maths lesson is structured
- Includes clear teaching notes for the more challenging areas of mathematics

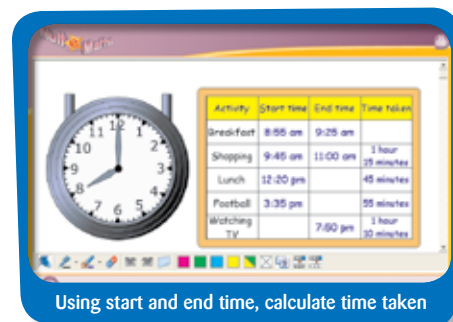

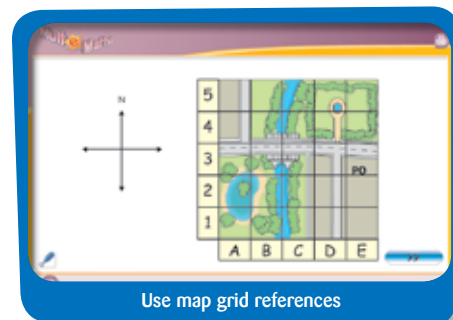

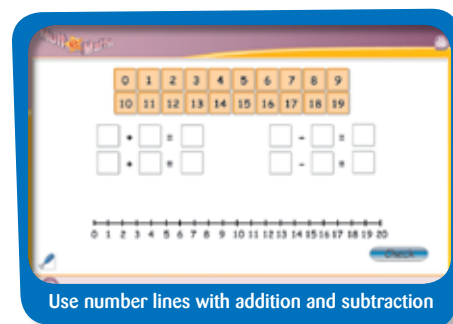

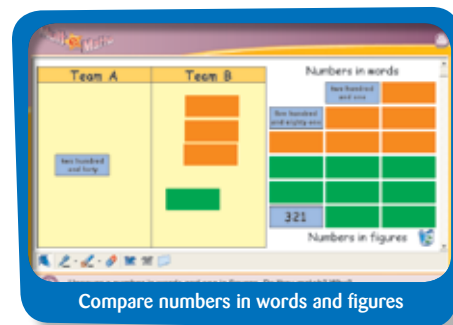

Titles Include:

- Teaching Year 3, Teaching Year 4, Teaching Year 5 and Teaching Year 6

What teachers say:

Mult-e-Maths provides visual and meaningful resources with clear teaching notes for the more challenging areas of mathematics.

Numeracy Activity Builder

The second in a series of new teacher tools from Black Cat. This ground breaking resource has been designed to make it easy to create high quality, ICT-based activities to support numeracy lessons.

Benefits:

- The potential for diversification of materials is enormous with a large bank of clip art and an assortment of themes to choose from
- Each framework has been created to support all areas of numeracy and is completely flexible
- Resources can be adapted to fit your learner's needs

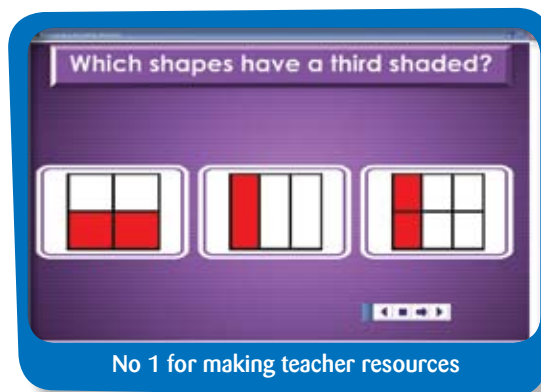

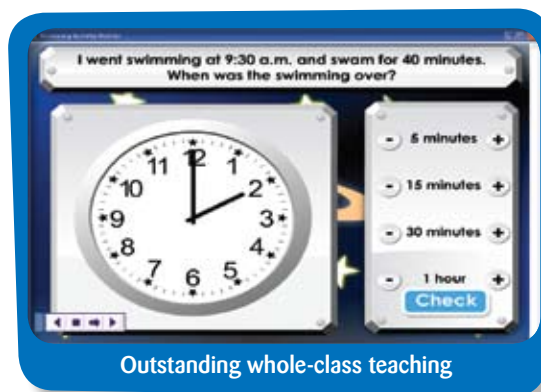

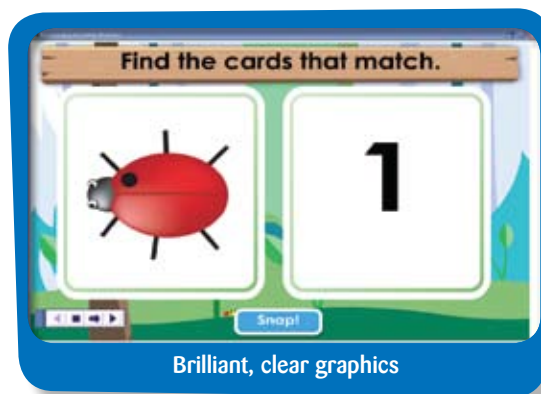

Features:

- Contains 300 sample activities and 14 tutorial videos
- Includes a range of activity types such as fractions, decimals and percentages, matching, snap, time, venn and carroll sorting, multiple-choice, number grid and sequencing

What teachers say:

As an ICT Co-ordinator I am always looking for software that will make teaching easier for the staff particularly now that we have IWB's in every room. This product allows all staff to prepare their lessons quickly and easily. A must have!

Joe Kenny, ICT Co-ordinator, Sandringham House, Sandringham

The Virtual Textbook

This large collection of interactive resources is designed to help teachers teach Maths to students aged 5 to 18.

Benefits:

- Helps maths teachers teach more productively
- Enables teachers to change key values and thus encourage the question, "What happens if ...?"
- Saves hours in preparing effective maths teaching materials

Features:

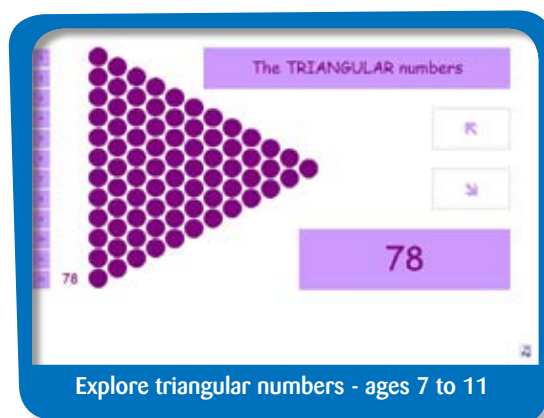

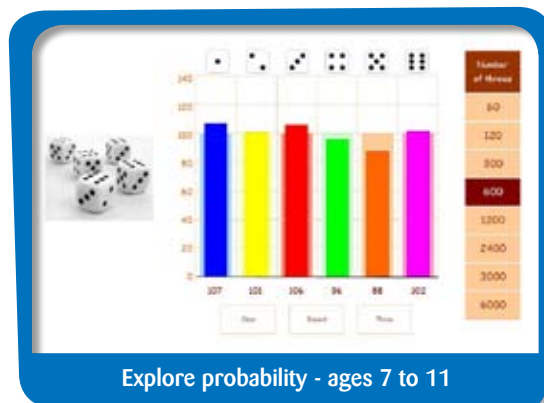

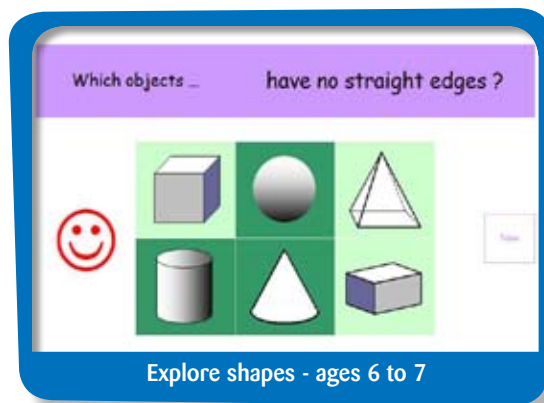

- 100 useful programs that make teaching maths easier
- Dynamic diagrams that change to reflect input
- Questions and correct answers on hundreds of themes

Primary School Highlights:

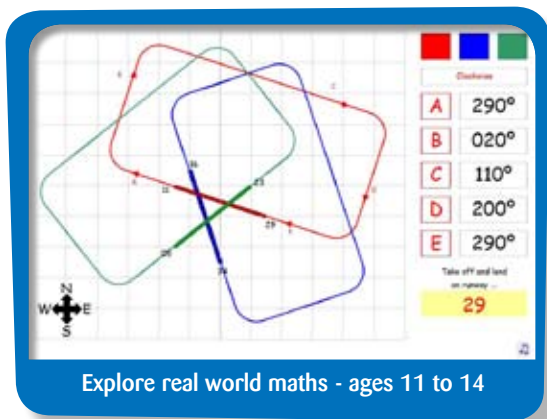

- 2D and 3D Shapes and Symmetry
- Count, Read, Order and Compare
- Multiplication and Division
- Time and Money
- Position and Direction
- Angle and Rotation
- Simple Fractions
- Organising and Interpreting Data
- Probability
- Drawing 3D in 2D
- Fractions: Add, Subtract
- Number Types
- Transformation: Enlargement
- Basic Operations
- Rounded Numbers
- Length, Mass and Capacity

Secondary School Highlights:

- Working with Fractions
- Calculus
- Area and Perimeter
- Data Handling
- Factorising
- Elementary Algebra
- Elementary Geometry
- Probability
- Indices
- Linear/Non-Linear Equations
- Quadratics
- Rounding Numbers: SF and DP
- Straight Lines: $Y=mX+c$
- Trigonometry: $X=\cos$, $Y=\sin$
- Algebraic Long Division
- Parabola
- Regression (Linear)
- Vectors
- Statistics

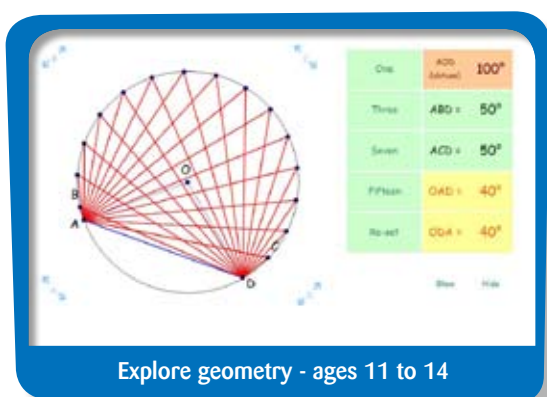

“Provides endless questions and answers on hundreds of maths themes”

What teachers say:

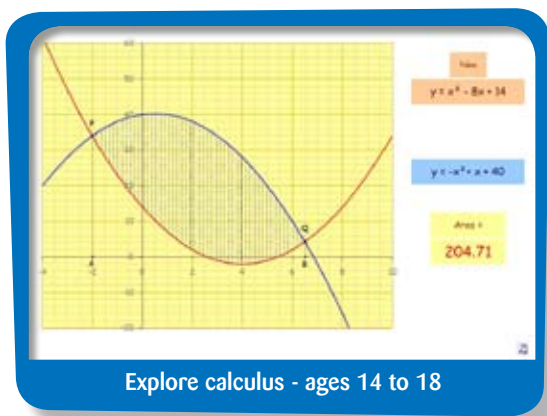

I have been writing Excel files for teaching and learning Mathematics ever since I was inspired by attending a course run by Michael Bawtree. Michael has produced hundreds of files along similar lines which he markets as The Virtual Textbook. ... I heartily recommend it.

Bill Piper, Maths Teacher, www.billpiper.co.uk

The Virtual Textbook is a series of fancy Excel spreadsheets designed to remove the need for textbooks in the classroom. Each spreadsheet can generate an infinite number of questions on each subject, with the answers only a click away. Many spreadsheets also have the option to reveal certain parts of the answer one at a time, which is useful. It is a nice idea and the speed at which the questions appear on screen keeps the pupils focused and on task ... Some of the Statistics spreadsheets are very, very impressive.

Craig Barton, Maths Teacher, Range High School and www.mrbartonmaths.com

The ease of use and breadth of content in The Virtual Textbook make it an ideal resource for both primary and secondary schools.

Destination Maths Minibytes

Comprehensive and motivating numeracy lessons to develop sound knowledge of mathematical fundamentals.

Benefits:

- Delightful characters and high quality graphics will have children fully engaged in learning
- Learners will become confident and proficient in the fundamentals of maths

Features:

- Topics include numbers, measures, fractions, decimals, shape and space
- Contains many numeracy activities to reinforce fundamental mathematical skills at an early age
- Flexible and easy-to-use

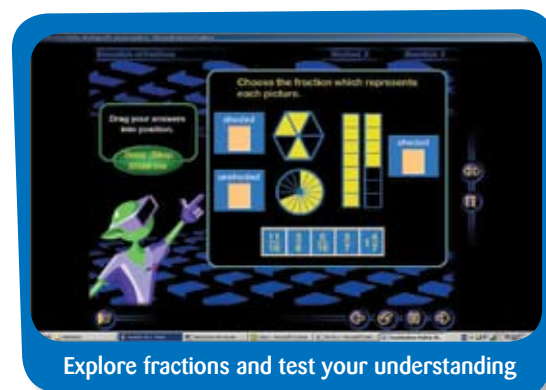

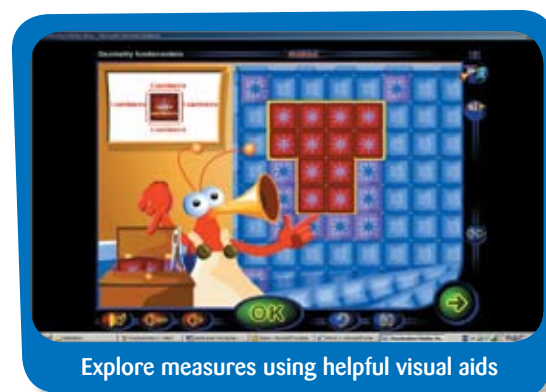

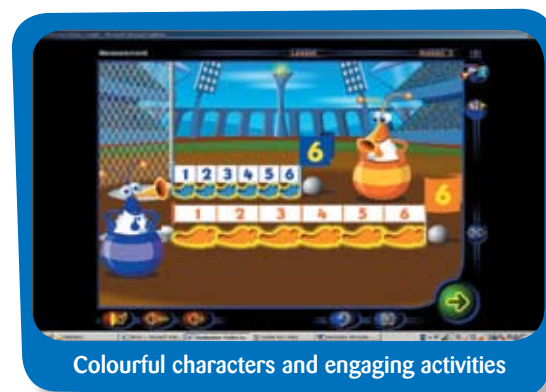

Titles include:

- Fractions & Decimals, Measures 4-6, Measures 5-7, Measures 7-11, Numbers 4-6, Numbers 5-7, Numbers 7-11, Shape & Space, Shapes 5-7, Shapes 7-11

What teachers say:

All the students love using this colourful, fun, flexible and essential numeracy resource. It has been ideal for using on the whiteboard to demonstrate concepts and been engaging enough for students to use on individual computers.

Destination Literacy Minibytes

This comprehensive program of engaging and motivating content helps children learn phonics, phonemic awareness and vocabulary to aid in the development of reading and comprehension skills.

Benefits:

- Helps students progress from non-readers to confident early readers and writers
- Ideal for those who need extra support
- Can be used to review skills and knowledge learnt in other ways and can provide a wider and deeper experience of words, texts and activities

Features:

- Literacy starters, talking books and songs
- Activities for phonics, grammar and spelling, writing and comprehension
- Highly motivating activities that make learning easy and fun

Titles include:

- Phonics 4-7, Literacy Starters 4-6, Literacy Starters 5-7, Literacy Starters 7-11, Talking Books & Songs 4-7, Talking Books & Songs 7-11, Writing & Comprehension 5-7, Writing & Comprehension 7-11, Grammar & Spelling 5-7, Grammar & Spelling 7-11

What teachers say:

We have been looking for literacy software to engage students using our new Interactive Whiteboards. We trialled the younger year level software first and ended up buying the whole set.

THE BEST PRODUCTS • THE BEST VALUE • THE BEST SUPPORT FOR SCHOOL AV NEEDS

Harnessing the potential of digital technology

“Interactive Whiteboards help to increase the enjoyment of the lesson for both students and teachers through more varied and dynamic use of resources with associated gains in motivation.”

The versatility of the IWBs means that they can be used at any age level to show photographs, maps, highlighted text, graphs, videos and intranet-based resources across all subject areas.

The introduction of the boards has also seen a greater need for quality, purpose-built software which has given students another vital avenue for learning. The IWBs are as relevant in maths as they are in LOTE, Science, Music and so on. The use of whiteboards allows for the seamless transition of materials from one medium to another - from text to videos from pictures to sound. The versatility of the boards enhances teaching time by allowing teachers to present web-based and other resources more efficiently. They allow for spontaneity and flexibility assisting teachers draw on and annotate a whole range of resources.

IWBs allow more opportunities for interaction and discussion in the classroom especially compared to other forms of ICT. They help to increase the enjoyment of the lesson for both students and teachers through more varied and dynamic use of resources with associated gains in motivation. Boards reduce the need for note-taking through their capacity to save and print what appears on the board.

The opportunities for collaboration and participation develop students' personal and social skills.

Different learning styles can be accommodated as teachers can call upon a variety of resources to suit particular needs. Students are able to cope with more complex concepts as a result of clearer, more efficient and more dynamic presentations.

IWBs allow teachers to integrate ICT into their lessons while teaching from anywhere in the room. The facility to have a convergence of media allows for a higher incidence of integration.

Mrs Jo Field – Head of Firbank Senior School

i-Read Series Years 3 to 6

Includes quality stories and non-fiction texts that have been newly written, plus poetry from children's favourite authors to motivate and engage. The software helps students explore and analyse texts using simple tools to highlight and annotate.

Benefits:

- Supports the teaching and learning of reading and manages the transition from reading to writing
- Makes best use of whiteboard technology, including music, video clips, sound effects, poetry, oral storytelling and dialogues to hone listening skills and help children engage with the text
- The program is built around the idea of the direct teaching of reading – you demonstrate the different strategies, then the children have a go themselves

Features:

- Printable teacher's notes and differentiated independent work to support introduction, delivery and consolidation of reading skills
- Glossary boxes with dictionary style definitions of the highlighted word to help struggling readers
- Comprehension questions for discussion with the whole class

Titles include:

- i-Read Year 3, i-Read Year 4, i-Read Year 5 and i-Read Year 6

What teachers say:

Our boys frequently ask, "Are we doing i-read today?"

Assistant Head, St Vincent's Primary School

Literacy Activity Builder

This program allows teachers to choose from 9 templates that make it easy to create customized literacy lessons – quickly, simply and effectively.

Benefits:

- Teachers are guided wizard style through the creation of their own content
- Saves valuable preparation time

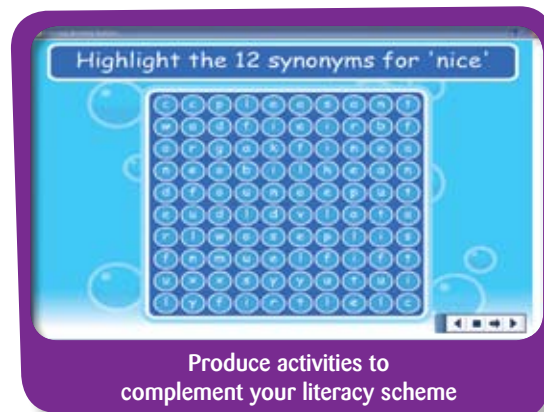

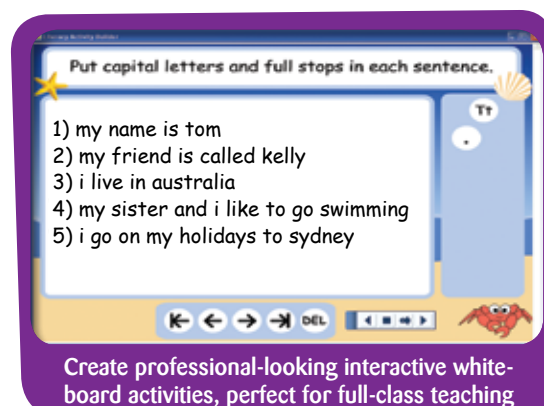

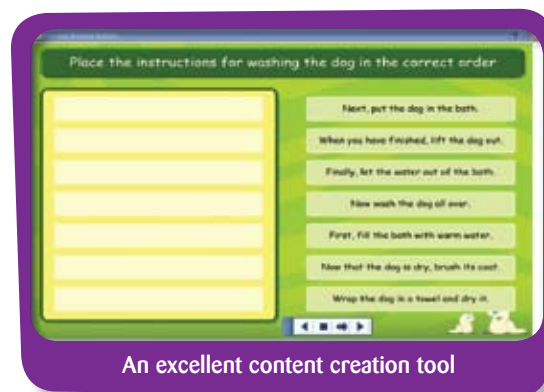

Features:

- Includes a range of activity types such as gap fill, punctuation, identify, multiple-choice, matching, sort and snap
- Generates a broad range of literacy worksheets for use away from the computer
- Creates word and sentence level activities for Prep to Year 6
- The program turns your content into professional-looking interactive whiteboard activities

What teachers say:

Literacy Activity Builder is a simple and straightforward software package which will help teachers use their interactive whiteboard more effectively for teaching literacy. The program allows you to create more imaginative and professional-looking lessons with relative ease. You have total control over the content. You simply input the text and with a click of a button the program does the rest – no more worries about design and presentation

Rodney Hill, Year 3 - 6 Team Leader Firbank Grammar School, Brighton

Activate the potential in your classroom

Promethean Interactive Whiteboards empower teachers to:

-  Improve the **engagement** with students: lessons are more **interesting** and the whole class can be **involved**.
-  Address the needs of different learners, who may have different learning **styles**. You can use **visuals**, **sound** and let them **touch** the board.
-  Use **personal response units** for formative assessment. **Activote** makes on-the-spot assessment very fast and very easy.

Promethean's **Award winning** Activstudio and Activprimary software, helps you to bring lessons to life across a whole range of subjects. It has all the tools you need to prepare compelling lessons just the way you want them. **Activstudio** is suitable for all ages and is free with any Activboard. **Activprimary** is especially designed for young learners, with a brightly coloured interface, chunky icons and a huge resource library. Flipchart Builder is a new application in version 3 of Activstudio and Activprimary which makes lesson preparation even easier and quicker with many templates available. Further resources and lessons are available online - providing everything you need to create an interactive, engaging educational experience.

Phonics Focus Series

Phonics Focus' story-based approach to phonics helps children accelerate their learning of phonics to become confident and successful readers and spellers.

Benefits:

- Teachers will find pupil attainment records for each activity and the option to input individual wordlists for students
- Offers a structured progression consistent with spelling rules
- Helps develop blending skills for fluent reading and segmenting skills for accurate spelling

Features:

- Printable teacher's notes for each activity to save planning time
- Instructions and activities include optional audio support to encourage children to work independently
- Teachers can record and track children's progress
- Helps teachers to identify students who are making good progress and those who are finding the activities more challenging
- Has structured, progressive and cumulative practice activities

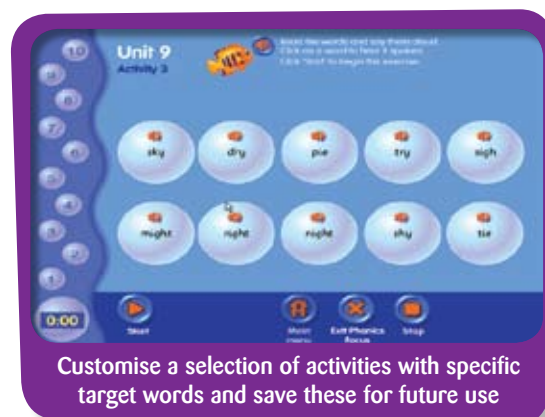

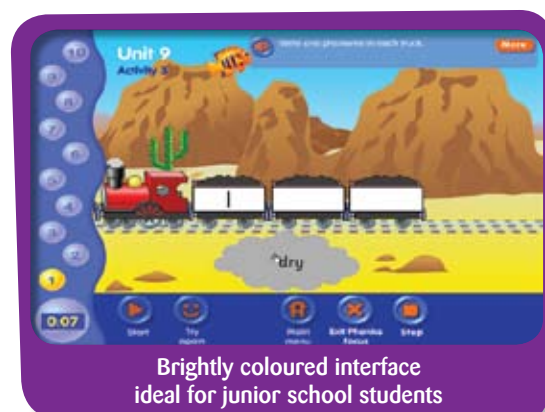

Titles include:

- Phonics Focus 1, Phonics Focus 2, Phonics Focus 3 and Phonics Focus 4

What teachers say:

The story-based approach to phonics practice helps children to read with confidence. The students enjoy the colourful illustrations, animations, interactive games and engaging narrators.

Read Me!

An effective literacy tool especially well suited to interactive whiteboards that can be used by all teachers.

Benefits:

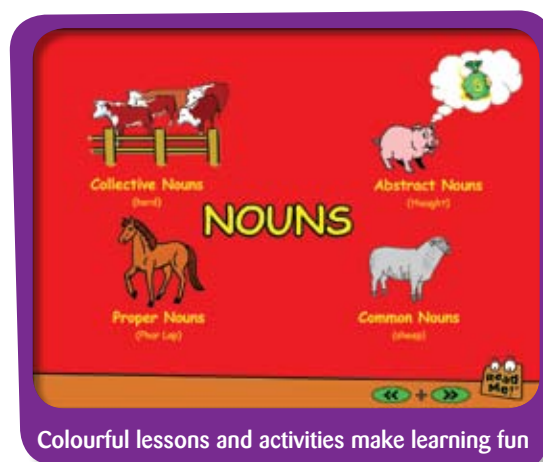

- Learning that is fun is learning that is retained
- Designed and produced by practising teachers
- Comprehensive and easy to use - minimal effort for teachers to start using immediately
- Lessons clearly explain how the English language works
- Some lessons conclude with a game

Features:

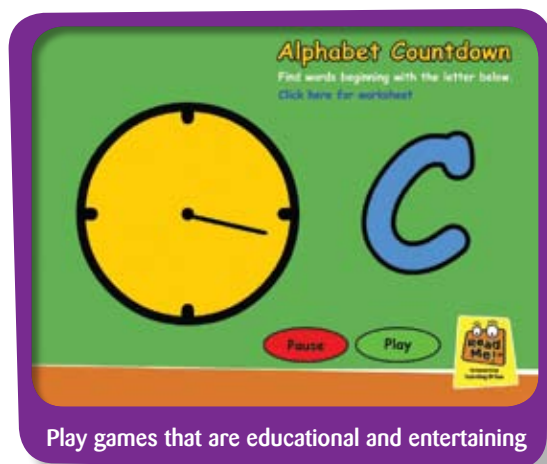

- Lessons are accompanied by 131 Black Line Masters which are fully reproducible and include an answer booklet
- Many of the interactive tasks are self-correcting
- Read Me will run in any browser and can be used across the network

“The complete literacy package for Interactive Whiteboards”

Play games that are educational and entertaining

Key curriculum coverage

Reinforce learning with handy black line masters

What teachers say:

Our teachers use ReadMe on our Interactive Whiteboards as it is a great tool to teach literacy skills. The graphics are engaging for students and the concepts are educationally sound. Students never get sick of the sounds and animations in the program. ReadMe is a great tool to get teachers started on Interactive Whiteboards as it is a complete package that delivers content in a reliable form. ReadMe is an excellent product.

Mr Paul Schnetker, Director of Technologies, Emmanuel College, Gold Coast, Australia

ReadMe are to be commended for their interactive CD. Text types, punctuation and word study, all in one smart user-friendly package which students and teachers love.

Tony Doyle, Head of Sandringham House, Firbank Grammar, Melbourne.

I was impressed by the ease of design, the interactivity of the software and the fact that independent worksheets allowed for effective teacher assessment of skills taught.

Trudi Gofton, Deputy Head – Curriculum, Anglican Church Grammar Preparatory School, Brisbane

As a teacher of English, I have found ReadMe to be extremely useful. The software activities cater for a wide range of ability levels within my Year 9 class ... Highly recommended.

LOOKING TO FINANCE YOUR NEW IWB PACKAGE?

Interlease in alliance with Dataworks Australia are pleased to provide a superior finance package for all new IWB and IT needs. With over 30 years experience in equipment finance we are able to provide the best flexible finance package in the market. Interlease prides itself with expert knowledge and know how in the industry with accreditations with over 40 financiers.

Benefits of financing your IWB and IT Equipment with Interlease:

- Take the burden of lump sum cash expense away from the school
- Quick approval process
- Free up cash flow for other projects that have a greater asset life
- Flexible Operating Lease/Rental agreements allow you to add additional equipment as you go. Keep your IT Equipment up to date with the latest technology available
- We will do all the work – once you have placed your order we will manage the whole process from invoicing to documentation and prompt settlement.
- Keep you informed throughout the leasing process

Storybook Phonics Series

Storybook Phonics is a lively phonics resource that helps children to read with confidence. These talking stories are attractively illustrated and animated to motivate pupils.

Benefits:

- Each story is supported by fun, interactive games to develop blending skills for fluent reading
- Helps children develop segmenting skills for accurate spelling
- Ideal for the reluctant reader as stories are fun and engaging
- Brought to life by engaging narrators

Features:

- Great titles such as "The Cat and the Rat", "Tricky Troll Billy Goats Gruff", "Town Mouse and Country Mouse" and many more
- Over 25 stories across 3 CD-ROMs
- Printable teacher's notes are provided for each activity with cross-referencing to the documents to save valuable planning time

Titles include:

- Storybook Phonics 1, Storybook Phonics 2 and Storybook Phonics 3

What teachers say:

The activities are brightly coloured and eye-catching and are extremely well thought through.

BroadLEARN Spell Stadium

BroadLEARN Spell Stadium is an innovative game-based program to help students develop sound spelling skills through fun and interactive activities.

Benefits:

- Easy-to-use, student-friendly interface
- Designed and produced in Australia for Australian students
- Suitable for students from year 3 to year 9
- Helps teachers test and profile student knowledge

Features:

- The ability to create your own games with easy-to-use templates
- Interactive word games to challenge students and reinforce a range of spelling strategies
- The ability to set the level of difficulty
- Activities to test and profile student knowledge
- Covers adverbs, homophones, prefixes, silent 'e', CVC words, plurals, suffixes and much more

What teachers say:

A great new Australian spelling program well suited to a broad range of ages and ability levels.

Andrew Dobbyn, ICT Co-ordinator, Brighton Grammar Junior School

Science Simulations Series

The Science Simulations Series provides a unique opportunity for pupils to conduct a series of “virtual” scientific experiments covering several key areas of science.

Benefits:

- Students can predict, carry out and evaluate investigations and then simply reset and start again!
- Select variables, control time, view results and chart each combination of variables over time

Features:

- 7 interactive simulations
- Dynamically generated tables, graphs and diagrams
- “Questions” mode to stimulate focused investigation
- Engaging graphics and simple, intuitive controls

Titles include:

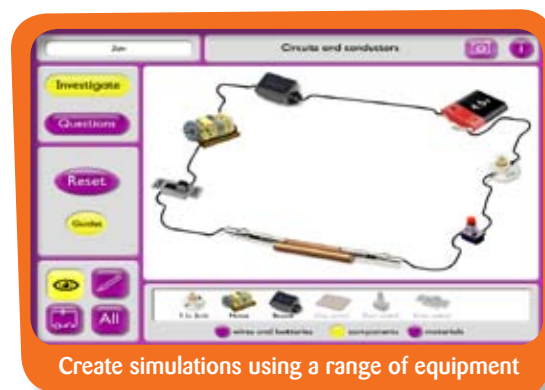

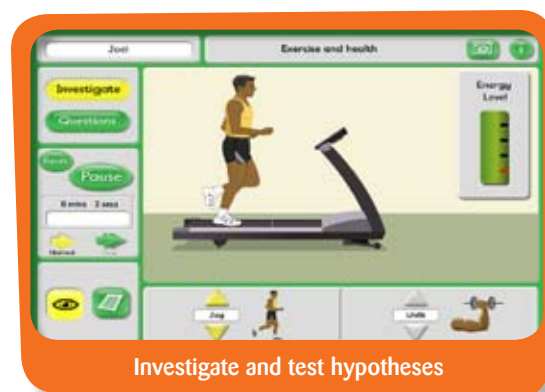

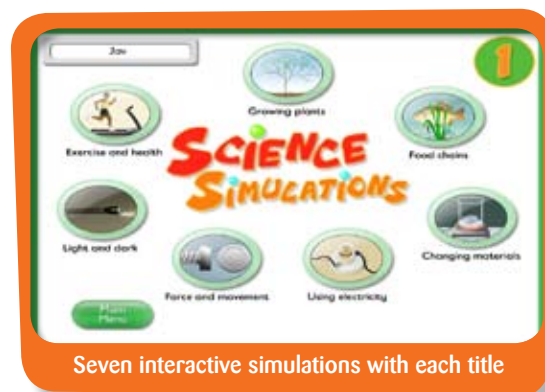

- Science Simulations 1
- Science Simulations 2
- Science Simulations 3

**AWARD
WINNER**

What teachers say:

I like this resource and can see its use in the Primary classroom. Some of the experiments it offers would be almost impossible to do in the classroom and others very difficult. The immediacy of results is useful, as is the ability to change the variables without any problems.

Human Body Systems

A comprehensive and highly acclaimed series of titles to support science teaching.

Benefits:

- Suitable for advanced courses in biology, human biology and health sciences
- Allows teachers to build and save lessons
- More effective learning through extensive use of visual representation of human body systems

Features:

- 3D models, simulations, illustrations, video clips, animations, photographs and diagrams to vividly illustrate topics
- Disc 1 covers the human skeleton, bones and joints, muscles and movement, nutrition, teeth, digestion, respiration, heart and circulation, the blood and a glossary
- Disc 2 covers vision, hearing, smell, taste and touch, the nervous systems and hormones
- Disc 3 covers reproduction, development, basics of inheritance, human genetics, infectious diseases and the immune system

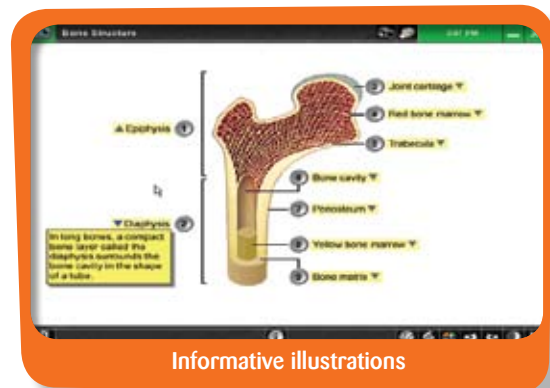

Titles include:

- Human Body Systems I, Human Body Systems II and Human Body Systems III

unlock your teaching potential

Professional Development courses include:

- © How to make the most of your Interactive Whiteboard
- © Creative Tools for Creative Schools including Toon Boom and Kahootz
- © Digital Storytelling
- © Stop Motion Animation

" We have Interactive Whiteboards in only a couple of rooms and before purchasing more I was keen to know what was available and what were the capabilities of the boards before we moved on. After attending a 'How to Make the Most of Your IWB' day we will certainly be purchasing more boards and the appropriate software so as to make the life of a student and teacher much easier. "

Barry Goode, Principal (Golden Square Primary School, Bendigo)

" I left the full day exhausted but with a strong belief that technology can accelerate student learning. It has given me confidence and enthusiasm to use the board in a much different way so as to engage students in a variety of forms and give them every opportunity to learn. It was great to see the different types of software that are available to all users of Interactive Whiteboards. "

Des Gilmore, Middle Years ICT Coordinator (Perth)

Science Activity Builder new

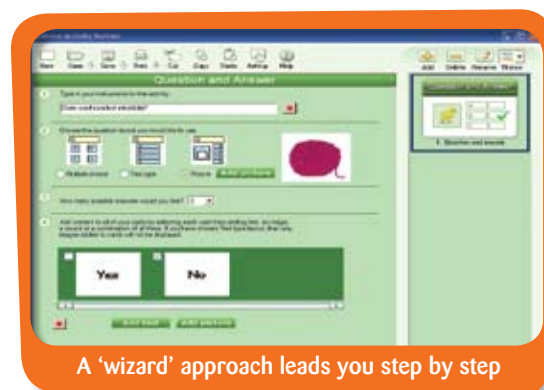

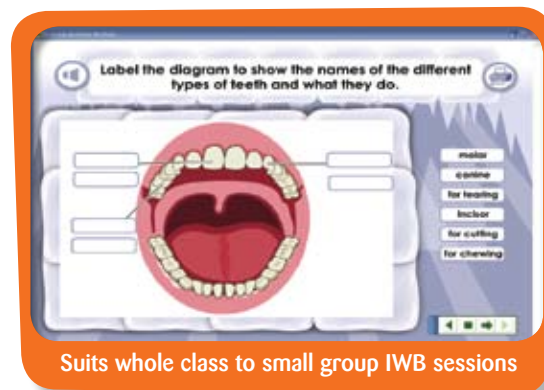

The third in the well-regarded Activity Builder series which offers teachers a tool to easily create activities for the science classroom.

Benefits:

- Use the templates to create materials for science topics such as electricity, forces, light and shadow
- The option to personalize the reward messages for individual pupils
- Suitable for use from junior primary to upper secondary level

Features:

- Includes a range of activity types including Pairs, Crossword, Lotto, Labelling, Eliminator, Question and Answer, Venn and Carroll Sorting, Table and Ordering
- Additional SEN features for users with visual impairments
- The import feature allows activities to be shared across the school
- Facility to translate all program text into multiple languages

What teachers say:

This software offers a quick and easy way to build interactive activities tailored to your needs. The on-screen tutorials make it very easy to learn how to set up your own activities and the 'wizard' approach takes you through each stage of the design step-by-step to ensure success.

PinkCow Review

BroadLEARN Human Biology

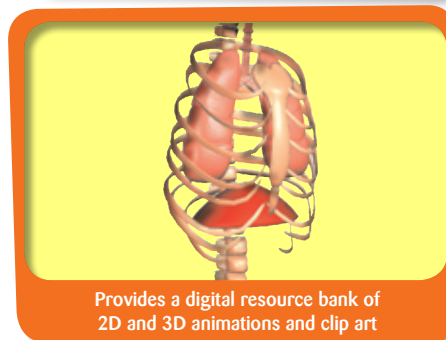

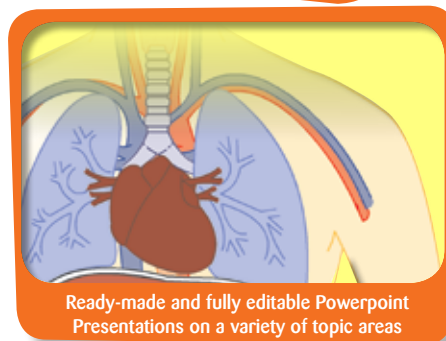

BroadLEARN Interactive Human Biology is a digital resource bank which provides a wealth of 2D and 3D animations and clip-art.

Benefits:

- Easy-to-use, student-friendly interface
- Designed and produced in Australia for Australian students
- Suitable for students from year 3 to year 8

Features:

- Topics include the human body, animal cells, circulatory and nervous systems, human brain, reproduction and respiration
- The resources can be used in a range of computer applications to create dynamic teacher lessons

Experiment Simulator

Experiment Simulator provides six simulated experiments to inspire and support your pupils, based on real experimental data and including error ranges.

Benefits:

- Ideal as an all-class teaching tool using an IWB or projector
- Includes worksheets, lesson plans and artwork
- Suitable for years 10 to 12
- Ease of use ensures students can use the product independently

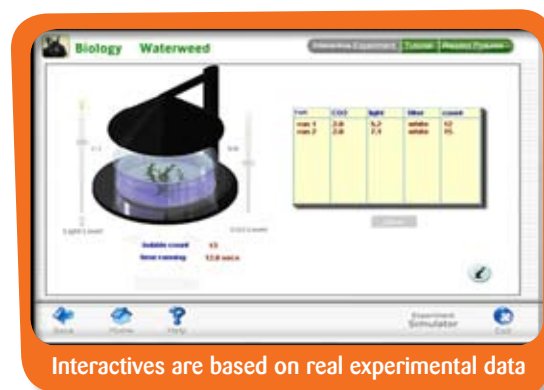

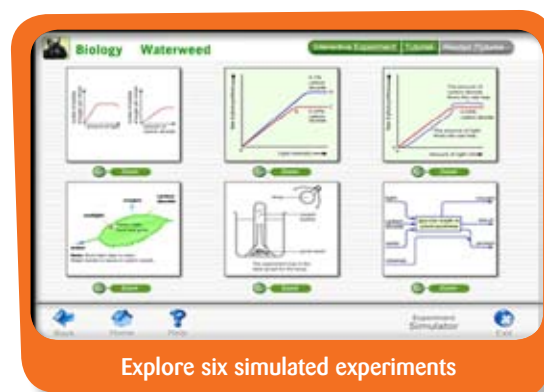

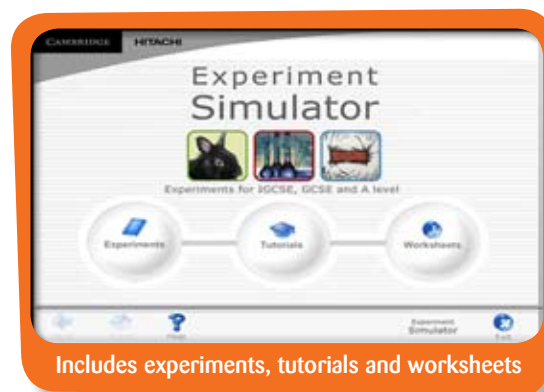

Features:

- Experiments include waterweed, rabbit genetics, electrolysis, marble chips, ball and ramp and magnetic fields.
- Aimed purely at experimental science and experimental skills development
- Real error ranges are included
- Ideal for whiteboard or data projector

What teachers say:

Aimed at experimental science and experimental skills development, the simulations and accompanying static artworks are ideal as an in-class teaching tool for a whiteboard or data projector.

Now nothing gets in the way of learning

The perfect interactive learning solution!

Combining the touch sensitive **FXDuo 77"** interactive whiteboard and the **CP-A100**, Ultra Short Throw LCD projector into one seamless package creates the ultimate in interactive teaching solutions. The CP-A100 is fully featured and boasts a short throw distance which helps to eliminate the problem of presenters obstructing the board, removes distracting shadows and adjusts to your teaching style rather than the other way around. The FX DUO 77" interactive whiteboard provides the other half of the solution with its dual, finger touch capable surface for the most simple interaction ever! The unique combination of these two products presents countless opportunities to learn and ensures that nothing will get between your lessons and your students.
